

Albert Solomin

Full-stack developer

Tallinn, Estonia | +372 5303 1696 | albert.solomin12@gmail.com
soloalbert.com | github.com/Biiiiird

PROFILE

Full-stack developer working mainly with the JavaScript/TypeScript ecosystem. I learn fastest by building things and putting them online. Recently completed Scrimba's Fullstack Developer Path course while building personal side projects and now looking for my first developer role in a team where I can keep growing.

SKILLS

Languages TypeScript JavaScript HTML CSS SQL Java Python

Frontend React Next.js (App Router · RSC) Tailwind CSS

Backend Node.js Express.js Java Spring REST APIs Authentication

Databases PostgreSQL MySQL SQLite Supabase

Tools Git GitHub Docker Linux AWS Lightsail Nginx Vercel

PROJECTS

BranchStorm AI

2025 – present

React, TypeScript · branchstorm.tellered.com

- Web app for brainstorming with AI. You can branch a conversation at any message and follow several ideas in parallel instead of one long linear chat.
- Live in production with user accounts and login.

Spiral Sounds

2026

Node.js, Express, SQLite, JavaScript · spiralsounds.soloalbert.com

- Online vinyl record shop with an Express backend exposing 11 REST endpoints for products, accounts and the shopping cart.
- Session-based login with bcrypt-hashed passwords, input validation and middleware that protects cart routes.
- SQLite schema for users, products and cart items, queried with plain SQL instead of an ORM.

PrintForge

2026

Next.js 15, React 19, TypeScript, Tailwind CSS · printforge.soloalbert.com

- Catalogue of 3D-printable models built with the App Router and React Server Components.
- Search, sorting, category pages and server-side pagination driven by URL parameters, with seed scripts that load the SQLite database from JSON.

soloalbert.com

2026

Next.js, TypeScript, Tailwind CSS, Vercel

- Personal portfolio site, deployed on Vercel.
- The first version ran on my own AWS Lightsail server, where I set up Linux, Nginx, the custom domain and HTTPS with Let's Encrypt.

EXPERIENCE

Communication Systems Specialist, Estonian Defence Forces

Dec 2024 – Jun 2025

Military service

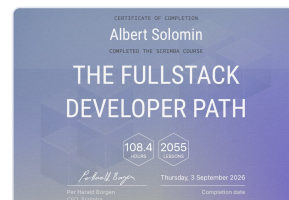

- Set up and configured ICT and communications equipment for the unit.

EDUCATION

The Fullstack Developer Path, Scrimba

Sep 2026

108 hours of interactive coursework on frontend, backend and databases.
