

EDUARD TELLER

SOFTWARE DEVELOPER

Back-end developer at Helmes, working on Java and Spring Boot services for clients such as Inditex and the Estonian government. I graduated from TalTech in 2025 with a Bachelor's degree in Information Technology. I also founded KooliTech OÜ, which supplies Estonian schools with software and technology. What I enjoy most is solving problems and working in a team.

Estonian (*native*)

Russian (*native*)

English (*Cambridge B2*)

WORK EXPERIENCE

Helmes, Back End Developer

August 2025 – Present | Full-time, hybrid

- **Inditex** (owner of Zara): worked on a Spring middleware API with REST, API contracts, databases, Redis and a lot of DevOps.
- **SKAIS2**, one of Estonia's largest government IT systems (pensions and family benefits): Spring Boot microservices, OpenTelemetry, personal data masking in logs.
- Migrating a legacy Angular 9 front end to an Angular 21 micro frontend.

KooliTech OÜ, Founder

2024 – Present | koolitech.ee

- Built E-Kell, an Electron and React app for school bells and internet radio.
- Sell E-Kell as a yearly licence, plus audio hardware and installation for schools.

AI Eesti, Software Developer

February 2025 – June 2025

- Built a Java Spring and React system that automates real estate valuation documents, cutting each valuation from days to hours.

EDUCATION

Tallinn University of Technology

Hardware Development and Programming
2022 – 2025
